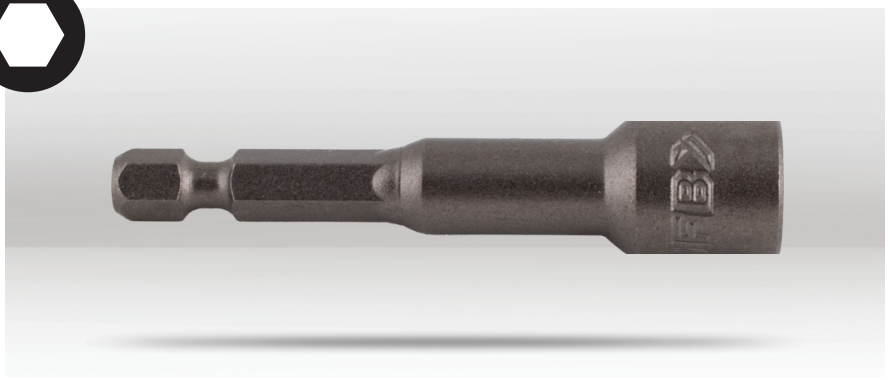
GFB

PRODUCT INFO

MAGNETIC NUTSETTERS



DESCRIPTION

GFB Industrial Tough nutsetters are specifically designed & manufactured to Australian conditions. Rare earth magnets have been used, which means that they are stronger and last longer than standard magnets. GFB nutsetters have a registered design incorporating an anti shock cushion to combat vibration and preserve the integrity of the magnet. Constructed from high tensile steel, GFB nutsetters provide robust performance. The 1/4" hex shank is designed to withstand impact force, making these tools ideal for heavy-duty applications.
