PACER MEASURING TAPE

FS-PY50

DESCRIPTION

The Fisco Pacer Long Measuring Tape is a heavy-duty, high specification open-frame tape designed for the professional user. This tape measures 50 meters in length and 13mm in width. The tape is made from a "Tough Coat" tough, yellow polyester coated steel material with an extra thick nylon coating for added protection. Resistant to common chemicals, solvents, abrasion and breakage, ensuring it can withstand harsh working environments. It is also accurate to EC Class II, graduated in mm, numbered in cm every cm, and marked with red metres and repeats. The tape is made in Britain and features an impact-resistant ABS frame with an integral ground spike, and a tough, high-impact polymer centre that offers additional strength to the winding mechanism. The low friction bearing ensures smooth rewind, while the long winding lever and easy-grip knob make rewinding fast and effective. Finally, the tape features a corrosion-resistant end-piece with a pressed steel end-loop fitted with a stainless steel claw.

FEATURES

- 'Tough Coat' nylon coated steel, accurate to EC Class II.
- Made in Britain.
- Impact resistant ABS frame with an integral ground spike.
- Tough, high impact polymer centre offers additional strength to the winding mechanism.
- Low friction bearing for smooth rewind.
- Long winding lever and easy-grip knob makes rewinding fast and effective.
- Corrosion resistant end-piece.

BARCODE: 5013623305709

BLADE LENGTH: 50m

BLADE WIDTH: 13mm

GRADUATIONS: mm

EC ACCURACY CLASS: II

BLADE TYPE: Nylon coated steel

DIMENSIONS: 350mm x 265mm x 50mm

WEIGHT: 1400g
