

PRODUCT INFO

SOAPSTONE HOLDER

KSSH500

DESCRIPTION

The Keson Soapstone Holder is a reliable tool for marking on metal surfaces, ideal for steel fabrication, welding, cutting, and layout work. It creates clear, accurate marks that are temporary, easy to remove, and safe for welds and metal surfaces. The flat soapstone fits securely in an all-metal holder that protects it from breakage, extending its usability. An adjustable wheel allows for precise control and full use of the soapstone. The built-in pocket clip offers added convenience, keeping the holder easily accessible on the job. Durable and efficient, it's a must-have for professionals and serious DIY users alike.

FEATURES

- Ideal for metal marking, welding, and fabrication.
- Flat soapstone makes temporary marks, easy to remove.
- Will not contaminate or damage surfaces.
- Durable all-metal holder prevents breakage.
- Adjustable wheel for precise soapstone control.
- Includes convenient pocket clip for easy access.
