

PRODUCT INFO

BRICK TROWEL - LONDON PATTERN

RG280-275

DESCRIPTION

The Ragni Brick Trowel is made with a flexible and well-balanced carbon steel blade, which has been hardened and tempered for extra strength and durability. With a soft grip handle, this makes it more durable and comfortable to hold. It also helps to prevent muscle fatigue, allowing you to work longer. This brick trowel was designed with a London pattern to allow for carrying more mortar farther forward on the blade, ideal for brickwork applications.

FEATURES

- Tempered and hardened
- Carbon steel blade
- Excellent knuckle clearance
- 1 year guarantee
