

PRODUCT INFO

PUTTY KNIFE

FP2030

DESCRIPTION

The Footprint Putty Knife is a highly functional tool designed to mix, fill, and spread putty with ease. Featuring a clipt point blade made from spring tempered steel, the blade is both hardened and tempered to provide a long-lasting edge for extended use. The hardwood scale tangs are securely riveted to the blade handle, providing added strength and durability to the knife. Made to the same high standards as all Footprint knives, this putty knife is a reliable and high-quality tool. Whether you're a professional tradesperson or a DIY enthusiast, the Footprint Putty Knife is an essential addition to your toolkit. Its sturdy construction and versatile design make it perfect for filling and repairing window frames, holes, and cracks in both residential and commercial settings. Proudly made in Sheffield, Britain.
