

PRODUCT INFO

# CABINET SCRAPERS

## FP241

### DESCRIPTION

The Footprint Cabinet scrapers are a set of three woodworking tools that are perfect for shaping and finishing wood. They excel in tricky grain areas where hand planes would cause tear out, making them an ideal choice for woodworking projects that require precision. Made from high carbon spring steel, these scrapers are designed to be durable and long-lasting. They are most suitable for working with hardwoods and can be used as an alternative to sandpaper for achieving a smooth finish on wood, resulting in a nicer finish compared to sanding. To keep the scrapers sharp, they can be re-sharpened using a burnisher, making them a reliable and versatile tool for any woodworking enthusiast or professional. Proudly made in Sheffield, Britain.

### FEATURES

- Ideal for shaping and finishing wood.
- High carbon spring steel for long-lasting use.
- Suitable for hardwoods.
- An alternative to sandpaper for a smoother finish.
- Re-sharpenable using a burnisher.
- Proudly made in Sheffield, Britain.
