

PRODUCT INFO

STAINLESS STEEL TAPING KNIVES

DESCRIPTION

These professional Ragni taping knives has a top-grade Japanese stainless steel blade with a strong aluminium backing. This offers strength along the full length of the blade and great flexibility while operating. The blade, made from high-quality stainless steel helps to resist rusting, gives great flexibility, and increases durability, as it is very hard and long lasting. Blade ground from 1.2mm at shoulder to 0.45mm at the knife point. This taping knife is perfect for your next drywall job! It's great for applying mud, finishing, laying tape, and more. It's large blade is designed specifically for scooping and spreading drywall mud onto seams and joints between panels. Three sizes are available: 200mm, 250mm & 300mm.
