HAND BELLOWS

PT1437

DESCRIPTION

The Plumtest Hand Bellows with Brass Valve is an essential tool for inflating gas lines. It features a durable brass check valve for secure and precise inflation. This hand bellows offers a fast and accurate method to pressurise gas lines, ensuring efficient operation. Additionally, it serves as a replacement part for the Plumtest Manometer kits PT1905, PT4512, and PT1826, providing seamless compatibility with these models. Ideal for professionals, it enhances the reliability and performance of gas line testing.
