

PRODUCT INFO

I-BEAM CONSTRUCTION BAR

E-PB18

DESCRIPTION

Estwing's Lightweight I-Beam Construction Pry Bar is forged in one piece from solid American steel, ensuring lasting durability and strength. The I-Beam design adds structural integrity while reducing overall weight for improved handling. Its high-leverage configuration and reinforced rocking head are engineered to maximise torque when pulling nails or prying boards. A beveled nail slot provides a secure grip on fasteners, while the angled chisel end allows for easy prying and lifting in tight spaces. Made in the U.S.A.

FEATURES

- Forged from one piece of solid American steel.
- Lightweight I-beam construction for strength without bulk.
- Reinforced rocking head for maximum leverage.
- High-leverage design for pulling and prying with torque.
- Beveled nail slot and chisel end for ease of use.
