

PRODUCT INFO

SPEEDLITE® SQUARE

SWT0118

DESCRIPTION

Introducing the 8 in. Speedlite® Square, a versatile tool designed for precision and durability. Made from lightweight, high-impact structural composite material, this square is both sturdy and lightweight, ensuring ease of use and portability. Its high-visibility orange color ensures it won't go unnoticed in your toolbox. With a beveled edge, reading measurements is a breeze, allowing for quick and accurate marking. Not only is it perfect for general use, but it's also specifically great for siding and delicate materials, as it won't mar soft finishes. The 8 in. size makes it ideal for marking cuts in 8 in. siding, and its 1/8 in. spaced notches facilitate scribing lines. Additionally, it features a center line guide for pinpointing the center of round stock. Look for the Diamond® symbol and experience the excellence of the Speedlite® Square.

FEATURES

- Great for siding and larger materials.
- Beveled edge for ease of reading.
- Lightweight high-impact structural composite material.
- Great for siding and won't mar finish!
- Spaced notches to facilitate scribing lines.
