SAVAGE™ SLIDING BEVEL

SWSVV150M

DESCRIPTION

The Swanson Savage™ T-Bevel Square is a precision tool designed for accuracy and versatility when marking, measuring, copying, or laying out angles. Its compact size and ergonomic design make it ideal for tradespeople who need a dependable, easy-to-handle bevel on the go. The stainless steel blade features chemically etched metric markings on both sides, with millimetre increments up to 20cm, ensuring ultimate accuracy. Built with a durable aerospace aluminium anodised frame and a plastic handle insert, it also includes a bottom-located metal tightening bolt for a unique dual-direction locking mechanism.

FEATURES

- Adjustable sliding bevel for marking & copying angles.
- 20cm stainless steel blade with mm increments.
- Metric markings on both sides of blade.
- Aerospace aluminum frame with plastic handle insert.
- Bottom-located metal tightening knob.
- Unique locking mechanism allows bevel to be used both ways.
- Chemically etched markings for long-lasting accuracy.
