CUT & BEVEL SAW BLADE

HLDDS0125-030

DESCRIPTION

The Holer Cut & Bevel Utility Blade is a high-performance diamond blade designed for cutting plastic, PVC, metal, cast iron, masonry, and other building materials. Featuring advanced vacuum brazed technology, it delivers extreme cutting speed with precision and cleanliness. Specifically engineered for cutting and bevelling pipes in one step, its bevel attachment also acts as a stop guide for added control. Ideal for wet and dry applications, this blade ensures efficiency when used in an upcut motion while rolling the pipe into the cut. Compatible with angle grinders featuring a 22.2mm standard bore, it's a versatile solution for professionals.

FEATURES

- For cutting plastic & PVC, metal & cast iron, masonry etc.
- Vacuum brazed technology for extreme fast cutting.
- Especially developed for cutting and bevelling pipes in 1 go.
- Vacuum brazed diamond technology - quick, clean and precise.
- Bevel attachment also serves as an additional stop guide.
- Blade should be used in upcut and the pipe should be rolled into the cut.
