

PRODUCT INFO

HANDY BARS

DESCRIPTION

Estwing's Handy Bar is a lightweight yet durable tool forged from a single piece of high-quality steel. Its half-round construction increases strength while reducing overall weight, making it ideal for extended use. The wide, thin blade is designed to minimise surface damage when pulling tough nails and excels in precision prying tasks. Engineered for high leverage, the bar delivers maximum torque for removing nails or lifting boards with ease. Its slim profile and balanced design make it a reliable choice for detailed trim work, including window and door frames, moulding, and baseboards. Made in Taiwan.

FEATURES

- One-piece forged steel for maximum durability.
- Half-round shape enhances strength and reduces weight.
- Wide, thin blade reduces marring.
- High leverage for greater prying power.
- Ideal for trim, moulding, and baseboard work.
