

PRODUCT INFO

FIBREGLASS SLEDGE HAMMERS

DESCRIPTION

The Estwing Fibreglass Sledge Hammer is built for heavy-duty performance, featuring a forged alloy steel head hardened to 50–58 HRC for superior strength and durability. Its 36" (915mm) overall length provides powerful leverage, ideal for demanding tasks such as demolition, driving fence posts, and fracturing concrete or stone. The double-injected handle contains over 70% fibreglass for shock absorption, with a textured TPR grip to reduce hand fatigue and improve control. A 25% wider neck offers added overstrike protection, while the strong head-to-handle bonding ensures long-lasting reliability. Optimised weight distribution delivers a balanced and effective strike every time.

FEATURES

- Forged alloy steel head, hardened to 50–58 HRC.
- Over 70% fibreglass handle with TPR grip for comfort and control.
- 25% wider neck protects against overstrike damage.
- Strong head-to-handle bonding.
- Well-balanced for consistent, powerful blows.
- Ideal for demolition, stone breaking, metal shaping, and more.

CODE	BARCODE	HEAD WEIGHT	LENGTH	HEAD WIDTH	HEAD DEPTH	HANDLE MATERIAL	WEIGHT
E-SHF06	0194199624021	6lb (2.72kg)	915mm (36")	150mm	55mm	Fibreglass / TPR Grip	3.89kg
E-SHF08	0194199624038	8lb (3.63kg)	915mm (36")	160mm	60mm	Fibreglass / TPR Grip	4.84kg
