

PRODUCT INFO

GERMAN LATTHAMMERS

DESCRIPTION

The Estwing German Pattern Latthammer is a precision-engineered roofing hammer commonly used in roofing and scaffold building. Forged from a single piece of American steel, it offers maximum strength and durability. It features a fully polished square head for accurate nail placement in corners and a built-in nail starter for one-handed operation. The bonded and moulded Shock Reduction Grip®, made of durable nylon-vinyl, reduces vibration impact by up to 70%. Its asymmetrical single-claw design functions as a nail puller, scraper, hole maker for slate tiles, and general-purpose prying tool.

Nail Starter

Available with & without magnet.

Smooth Face ideal for clean, mark-free striking.

Milled Face provides superior traction on nails.
