

PRODUCT INFO

ROCK PICKS

DESCRIPTION

The Estwing Pointed Tip Rock Pick is a trusted tool for geologists worldwide, known for its strength, balance, and durability. Forged from one solid piece of American steel, it features a fully polished head and a smooth square striking face for precise performance. The pointed tip is ideal for chipping and prying in rugged terrain. Estwing's patented Shock Reduction Grip®—bonded and moulded from nylon-vinyl—reduces impact vibrations by up to 70%, ensuring all-day comfort and control. A protective sheath is available, sold separately (E-23). Made in the U.S.A.

FEATURES

- Forged in one piece from solid American steel.
- Fully polished head for clean, professional finish.
- Pointed tip ideal for chipping and prying rock.
- Smooth square striking face for precision.
- Shock Reduction Grip® reduces vibrations by up to 70%.
- Grip is bonded and moulded from durable nylon-vinyl.
