

PRODUCT INFO

BALL PEIN HAMMERS

DESCRIPTION

The Estwing Ball Pein Hammer is forged in one solid piece of American steel for maximum strength and durability. It features a fully polished head with a smooth face, suitable for metalworking tasks such as shaping metal, peening rivets, and rounding edges. The bonded and moulded Shock Reduction Grip® is made of nylon-vinyl and reduces vibration caused by impact by up to 70%. This grip is permanently attached and provides added comfort and control. The one-piece construction ensures long-lasting performance in workshop and industrial settings. Made in the U.S.A.

FEATURES

- Forged in one piece from solid American steel.
- Fully polished head for clean, professional finish.
- Ideal for shaping metal, peening rivets, and rounding edges.
- Shock Reduction Grip® reduces vibrations by up to 70%.
- Grip is bonded and moulded from durable nylon-vinyl.
- Designed for metalworking and industrial applications.
