

PRODUCT INFO

CARPENTERS SQUARES

DESCRIPTION

Footprint Carpenter's Try Squares are used by Craftsmen all over the world to mark and check right angles on wood and joints. Each square features a hardened steel blade that has been chemically blued to resist corrosion. Additionally, the blade is securely fixed to the stock with three brass rivets. The stock is crafted from durable African Rosewood (Bubinga), known for its hard-wearing properties, and features a brass plate on the face to maintain squareness and extend the tool's lifespan. Proudly made in Sheffield, Britain.

FEATURES

- Hardened steel blade, chemically blued to resist corrosion.
- Stock made from durable African Rosewood (Bubinga).
- Blade attached to stock with three brass rivets.
- Brass plate on stock face maintains squareness and extends life.

SKU	BARCODE	ANGLE	BLADE LENGTH	BLADE WIDTH	MATERIAL	DIMENSIONS	WEIGHT
