

PRODUCT INFO

DOUBLE FACED MALLET

E-DFH12

DESCRIPTION

This Estwing 12-oz Mallet features a dual-faced design with plastic tips connected by a forged steel core. It's ideal for tasks that require non-marring strikes, such as assembling furniture, setting dowels, or working on delicate wood projects. The hammer includes two different head types: a softer red cap (40 Shore D) and a firmer yellow cap (60 Shore D), allowing versatility for a range of materials. A genuine hickory wood curved handle offers comfort and grip, while triple wedge construction securely locks the head in place for reliable, long-term use.

FEATURES

- Dual plastic faces: red (40 Shore D), yellow (60 Shore D)
- Double-faced for soft and hard striking options.
- Non-marring design protects work surfaces from damage.
- Genuine curved hickory handle for comfort and control.
- Triple wedge construction for secure head attachment.
- Forged steel core for strength.
