INSULATED PROBING SPEAR

PT7894

DESCRIPTION

The Plumtool Safety Probe is an insulated probing spear designed for safely locating underground pipes, tanks, utility lines, and other hidden objects without the need for digging. Measuring 1130mm in length, it features fully insulated handles tested to 5,000 volts, providing protection against accidental electrocution during use. The sharp end point allows for accurate probing, while the handle and shaft can be dismantled for convenient storage and easy transportation. Built for durability and safety, this tool is essential for professionals needing a reliable way to investigate underground areas.

FEATURES

- Find underground pipes without digging.
- 1130mm length with sharp end point.
- Fully insulated handles tested to 5,000 volts.
- Protects against accidental electrocution.
- Handle and shaft dismantle for easy transport and storage.

BARCODE: 9348099000688

LENGTH: 1130mm

SHAFT DIAMETER: 10mm

TIP DIAMETER: 13mm

HANDLE WIDTH: 270mm

INSULATED: Yes, tested to 5000V

WEIGHT: 1.9kg
