THERMOCOUPLE TESTING & TOOL KIT

PT5301

6 PC

DESCRIPTION

The Plumtool Thermocouple Testing and Tool Kit makes testing and replacing thermocouples simple and efficient. Supplied with a thermocouple tester, adjustable wrench, two flare nut spanners (8-11 mm) and two open-end spanners (8-11 mm), it has everything needed for the job. Designed for quick diagnosis, the tester confirms whether the issue lies with the thermocouple or the control, saving time and effort on site. A smart solution that avoids unnecessary replacements - perfect for plumbers and gas fitters.

FEATURES

- For testing and replacing thermocouples.
- Quickly diagnoses whether the fault is with the thermocouple or appliance control.
- Easy to use, saving time and effort.
- Ideal for plumbers and gas fitters.
- Helps avoid unnecessary replacements.
