

PRODUCT INFO

AUTOCUT® COPPER PIPE CUTTER SET WITH HANDLES MM1741E

2_{PC}

DESCRIPTION

The Monument Autocut® 2pc Copper Pipe Cutter Set includes 15mm and 21mm cutters along with two Restricted Access Handles. The handles slip over the zinc diecast body of each cutter, enabling a ratchet-type action that is ideal for use in confined or restricted spaces. Each cutter produces a clean, square edge to help reduce leaks and uneven joints and is size-specific, cutting only the stated pipe diameter. The cutters come preloaded with replaceable, heat-treated steel cutting wheels (spares available separately). Not suitable for stainless steel tubes. Made in Britain.

FEATURES

- Includes 15mm & 21mm Autocut copper pipe cutters.
- The restricted access handles slip over pipe cutter body for ratchet-type action.
- Ideal for use where access is restricted.
- Designed for precise cutting of copper pipes only.
- Zinc diecast, compact design body.
- Preloaded with a replaceable, heat-treated steel cutting wheel.
