AUTOCUT® COPPER PIPE CUTTER SET MMNZACKIT

3_{PC}

DESCRIPTION

The Monument 3pc Autocut® Copper Pipe Cutter Set is designed for precise cutting of copper pipes with outer diameters of 15mm, 21mm & 27mm. It features a zinc diecast body and a compact design suitable for use in confined spaces. The cutter clips onto the pipe and cuts in one direction only, producing a clean, square edge that reduces the risk of leaks and uneven joints. Each model is size-specific and will only cut the stated pipe diameter. Supplied with a preloaded, replaceable, heat-treated steel cutting wheel (spares available separately). Not suitable for stainless steel tubes. Supplied in a black plastic casing with foam-lined insert for easy travel and safe storage. Made in Britain.
