

PRODUCT INFO

ADJUSTABLE PIPE CUTTER MM266E

DESCRIPTION

The Monument Adjustable Pipe Cutter is designed for cutting thin-walled metal pipes, including copper, brass, aluminium, and light gauge steel. Its adjustable mechanism accommodates pipe diameters from 12.7mm to 44mm. The body is constructed from zinc diecast, with heat-treated components in all wear-prone areas, including hardened rollers and pins. The tip of the body design is an integrated pipe-deburrer. It features a preloaded, replaceable, heat-treated steel cutting wheel, with a spare wheel stored in the handle. Blade replacement is straightforward, requiring only the removal of the wheel pin. Made in Britain.

FEATURES

- For copper, brass, aluminium & light gauge steel pipes.
- Adjustable for 12.7mm – 44mm diameter pipes.
- Zinc diecast body with heat-treated wear parts.
- Features an integrated pipe deburrer.
- Preloaded, replaceable heat-treated steel cutting wheel.
- Spare wheel stored in handle.

USE WITH

MMX273 Wheel for Copper

MMX284 Wheel for Stainless Steel

BARCODE: 5015375002660

CAPACITY: Ø 12-43mm (1/2"-1 3/4")

THICKNESS CAPACITY: 3mm

LENGTH: 200-250mm (Min-Max)

WIDTH: 65mm

DEPTH: 35mm

CUTS: Copper, Aluminium, Brass

BODY MATERIAL: Zinc Diecast

WEIGHT: 462g
