

P R O D U C T I N F O**OMAT® SOLDERING MAT**
MM2355M**DESCRIPTION**

The Monument Omat® Soldering Mat is a patented high-temperature mat designed for use with butane and propane torches when soldering 15-22 mm copper pipes. Manufactured from heavy-density woven glass fibre, it resists temperatures up to 600 °C and is tested to European Standard BS 476. The 300mm x 300mm mat features a cut-out design that wraps around pipework, protecting nearby paintwork and woodwork from heat damage. Unlike conventional flat mats, the Omat® provides complete protection to surrounding surfaces and contains no asbestos-related materials. Made in Britain.

FEATURES

- Patented high-temperature mat for soldering.
- Suitable for use with butane and propane.
- Made from heavy-density woven glass fibre.
- Resists temperatures up to 600 °C.
- Cut-out design to wrap around pipework (15mm-22mm).
- Protects paintwork and woodwork from heat damage.
