# **GRIP+ PRO BASIN WRENCH**

## **MM349**

### **DESCRIPTION**

The Monument Grip+ Pro Basin Wrench is designed for loosening and tightening nuts in hard-to-reach areas, such as tap and waste nuts under sinks and baths. It features a swivel jointed head for multiple angles of access and a steel nickel-plated handle with a removable tommy bar and 1/2" hexagonal end for socket or extension use. The wrench comes with three heat-treated, CNC-milled jaws: small (28mm), medium (38mm), and large (50mm) which are removable, interchangeable, and replaceable. The handle also includes storage for one jaw. Made in Britain.

### **FEATURES**

- Used for loosening and tightening nuts in tight spaces.
- Swivel jointed head for angled access.
- Removable t-bar and 1/2" hex end for sockets/extensions.
- Supplied with 3 heat-treated CNC-milled jaws.
- Jaws are removable, interchangeable, and replaceable.
- Small & medium jaws - suits 1/2" & 3/4" taps.
- Large jaw - suits larger fittings like waste pipe nuts.
- Handle includes storage for one jaw.
