

PRODUCT INFO

DIY TAP RESEATER

MM450P

DESCRIPTION

The Monument DIY Tap Reseater is designed to re-cut the seats of leaking taps, compatible with most 1/2" and 3/4" taps. It fits popular BS 5412 and BS 1010 tap standards. The tool is supplied with three case-hardened flat cutters (17, 19, 25mm) and two double-ended plastic parallel bushes for accurate alignment. It features a knob handle that is ergonomic and comfortable for manual use. Suitable for DIY maintenance, this tap reseater provides a straightforward solution for restoring tap performance without replacing the entire fixture. Made in Britain.

FEATURES

- Re-cuts seats of leaking taps.
- Fits most 1/2" & 3/4" taps.
- Compatible with BS 5412 and BS 1010 taps.
- Supplied with 3 flat cutters (17, 19, 25mm).
- Includes 2 double-ended plastic parallel bushes.
- Ergonomic knob handle.

INSTRUCTIONS

1. Shut off water. Remove tap shield or handle if needed.
2. Select correct bush and fit it onto the tool spindle with threaded end down. Also attach appropriate sized cutter.
3. Insert tool into tap, screwing bush into the thread.
4. Turn knob clockwise with light pressure, 5–6 turns.
5. Examine the seat to make sure that it is re-cut smoothly, replace washer if needed, then reassemble tap.
