

PRODUCT INFO

# SLIDING BEVEL

## SW780-250

### DESCRIPTION

For precise angle layout and transfer tasks, having a Shinwa Sliding Bevel is indispensable. Its easily adjustable design securely locks angles until adjustment is needed, ensuring accuracy without slippage. Crafted with a solid aluminum handle and a durable steel blade, it's versatile for various projects, from intricate detailing to robust tasks. The unobtrusive locking screw located at the tool's rear simplifies angle transferring, making it ideal for woodworking projects like dovetailing. With its capability to measure and transfer any angle seamlessly, this bevel is a game-changer for any toolbox, promising efficiency and precision in every use.

### FEATURES

- Measuring and transferring any angle.
- The perfect tool for dovetail or any woodworking project.
- Locking screw at rear: unobtrusive locking screw that makes transferring easy.
- Solid aluminum handle and durable steel blade for versatility.
