

## PRODUCT INFO

# 21OZ MILLED LATTHAMMER

## E3-239MM

### DESCRIPTION

The Estwing German Pattern Latthammer is a precision-engineered roofing hammer commonly used in roofing and scaffold building. Forged from a single piece of American steel, it offers maximum strength and durability, with a fully polished head and milled face for superior traction on nails. It features a square head for accurate nail placement in corners and a built-in magnetic nail starter for one-handed operation. The bonded and moulded Shock Reduction Grip®, made of durable nylon-vinyl, reduces vibration impact by up to 70%. Its asymmetrical single-claw design functions as a nail puller, scraper, hole maker for slate tiles, and general-purpose prying tool.
