

PRODUCT INFO

SLIDING BEVEL

SWTS150

DESCRIPTION

The Swanson 200mm Sliding Bevel is a versatile measuring tool designed for transferring angles and checking depths across a wide range of construction and woodworking tasks. It features an integrated level vial to assist with accurate alignment and precise angle transfer. The heavy duty composite handle provides durability while remaining lightweight for easy portability on the job. A stainless steel 8 in. (200mm) blade offers strength and corrosion resistance, and can be securely locked in position using the knurled adjustment knob for reliable, repeatable measurements.

FEATURES

- Ideal for transferring angles and use as a depth gauge.
- Integrated level vial for accurate alignment and measurements.
- Heavy duty composite handle with lightweight design.
- Stainless steel 200mm blade for strength and durability.
- Knurled locking knob securely fixes blade position.
