

PRODUCT INFO

PLASTIC PIPE CUTTER

MGB-63S

DESCRIPTION

The Stanway Trade Heavy-Duty Plastic Pipe Cutter is suitable for cutting pipes made from synthetic resins including PVC, ABS and PE. It has a pipe cutting capacity of 25–63mm (1"–2 1/2"), making it ideal for a wide range of plumbing and installation tasks. The heat-treated stainless steel blade provides strength and durability for ongoing use. A ratcheting mechanism ensures controlled, efficient cutting, and to start a new cut, simply pull open both handles. The cutter features anti-rust and anti-wear properties, along with a safety hook on the handle ends for secure storage when not in use.

FEATURES

- Cuts pipes made of synthetic resins (PVC, ABS, and PE).
- Heat-treated stainless steel blade.
- To start a new cut, simply pull open both handles.
- Ratchet action mechanism.
- Anti-rust, anti-wear.
- Safety hook on handle ends.
- Do NOT attempt to cut metal pipes.
