

PRODUCT INFO

BASIN WRENCH

MGQ-10

DESCRIPTION

The Stanway Trade Pivoting Handle Basin Wrench is built for plumbing tasks in tight spaces. Perfect for under-sink work, wash basins, ballcocks, and flush valves, its slimline design allows access where other tools can't reach. The 250mm chrome vanadium shaft provides long reach, while durable forged steel jaws fit nuts from 10–32 mm. The head flips 180° for easy tightening and loosening, and the 225° pivoting handle offers superior leverage in awkward positions. A knurled grip ensures maximum control, making this wrench a reliable, versatile solution for professional and DIY plumbing projects.

FEATURES

- Tightens and loosens nuts/fittings in hard-to-reach places.
- Perfect for under sink applications, wash basins, ballcocks, flush valves.
