

PRODUCT INFO

PROBING SPEAR

TW8000

DESCRIPTION

The Stanway Trade Probing Spear is an essential tool for locating buried pipes, tanks, utility lines, and other underground objects. Crafted from high-quality steel, it offers strength and durability for repeated use. The sharp pointed tip allows easy penetration into the ground, while the 1180mm length provides excellent reach. Its comfortable soft blue rubber handle ensures a secure, non-slip grip, making it easier to apply pressure without strain. Durable, practical, and built for trade professionals, this probing spear delivers both precision and performance in every use.

FEATURES

- Ideal for locating buried pipes, tanks, and utility lines.
- Sharp pointed end for precise probing
- 1180mm length for long underground reach.
- Made from high-quality steel for strength and durability.
- Soft blue rubber handle for maximum grip and comfort.
