

PRODUCT INFO

CONCRETE PLACER

TW156

DESCRIPTION

The Stanway Aluminium Concrete Placer with Hook is a versatile tool designed for efficiently setting rebar and spreading/placing concrete. Crafted from robust yet lightweight aluminum, it boasts a 508mm x 102mm angled blade with an optimal curve, making it easy to push and pull material into place while spreading and leveling concrete. The head's hook feature aids in moving rebar and mesh during concrete placement. With welded heavy-duty aluminum braces for added durability and a 1.5m (60") long handle equipped with a textured foam grip, this placer offers both strength and comfort for seamless concrete work.

FEATURES

- Ideal for setting rebar and spreading/placing concrete.
- Handle & blade made of strong lightweight aluminum.
- Angled blade with optimal curve.
- Welded heavy-duty aluminum braces for added strength.
- Includes a hook for moving rebar and mesh.
- Handle has a textured foam grip for comfortable use.
