

PRODUCT INFO

MAGNESIUM FLOAT

FULLY ROUNDED

DESCRIPTION

The Stanway Magnesium Floats with Round Ends are an essential tool for air-entrained concrete work, offering a smoother finish than traditional wooden Hand Floats. Their tough, durable extrusion magnesium blade is both lightweight and long-lasting, ensuring efficiency and ease of use. The fully rounded ends of the floats ensure that no float marks are left behind, guaranteeing a seamless preparation of the concrete surface for troweling. The soft-grip ergonomic handle (made of thermoplastic rubber) adds comfort during extended use, making these floats a preferred choice for professionals seeking high-quality tools that deliver exceptional results in concrete finishing projects.

FEATURES

- Recommended for use with air-entrained concrete work.
- Tough durable extrusion magnesium blade, lightweight.
- Fully rounded ends eliminate float marks.
- Soft-grip ergonomic handle for grip and comfort.
- Provides a smoother finish than wooden hand floats.
