

PRODUCT INFO

MAGNESIUM FLOAT SQUARE ENDED

DESCRIPTION

The Stanway Magnesium Floats with Square Ends are an essential tool for air-entrained concrete work, offering a smoother finish than traditional wooden Hand Floats. Their tough, durable extrusion magnesium blade is both lightweight and long-lasting, ensuring efficiency and ease of use. The float ends are thoughtfully designed with beveling, while the blade features rounded corners, enhancing balance and weight distribution for precise control. The soft-grip ergonomic handle (made of thermoplastic rubber) adds comfort during extended use, making these floats a preferred choice for professionals seeking high-quality tools that deliver exceptional results in concrete finishing projects.

FEATURES

- Recommended for use with air-entrained concrete work.
- Tough durable extrusion magnesium blade, lightweight.
- Float ends are beveled and the blade is broken-in with rounded corner.
- Beveled edges offer better balance and weight distribution.
- Soft-grip ergonomic handle for grip and comfort.
- Provides a smoother finish than wooden hand floats.
