

PRODUCT INFO

TRADELIFT PLUS™ EXTENSION

DESCRIPTION

This robust telescopic Extension Accessory for the Stanley® FatMax® TradeLift™ is adjustable to working heights from 295mm to 685mm. Supporting an impressive 150kg maximum load, it features a lift plate that mirrors the dimensions of the base plate for optimum stability during use. For enhanced safety, the accessory attaches securely to the TradeLift™ to prevent separation during operation. Constructed from aluminium with reinforced plastic components, it is built for durability. Tool-free attachment and adjustment make setup quick and convenient, while aluminium levers secure the accessory to the TradeLift™ for efficient installation and removal. Aluminium locking pins lock the telescopic extension at three height positions for added versatility. A removable protective cover on the lifting plate helps prevent scratches and marks on surfaces. Designed to assist with lifting large items such as stairs, windows, cabinets and appliances when working alone, it is ideal for professional lifting, levelling, holding and fitting applications.

FEATURES
