SPECIAL GRIP LOCKING PLIER

GO131-10RL

DESCRIPTION

The Grip-On 131-RL Special Grip Locking Plier is a versatile professional-grade tool designed for mechanics, welders, fabricators, plumbers, agricultural users, or general DIY applications. Based on the proven 131 Omnium jaw design, it combines curved and convex gripping profiles for secure holding of round and irregular-shaped materials. A specialised end nub at the tip of the jaws allows positive engagement with chains and other unique or specialised gripping applications, delivering enhanced control in awkward, heavy-duty, or oversized situations commonly found in workshop and farm environments. The adjustable jaw opening provides excellent versatility, while the ergonomic design ensures comfortable handling, pinch-free operation, and easy release. Forged steel jaws deliver outstanding strength and durability, and the epoxy-coated finish offers corrosion resistance up to 20 times greater than nickel plating for long-lasting performance.

FEATURES

- Special edition model designed for unique or specialized applications.
- Securely grips large, round, and irregular shaped objects.
- Adjustable jaw opening.
- Ergonomic, no-pinch design with easy release for comfortable handling.
- Superior quality, forged steel jaws.
- Corrosion-resistant Epoxy paint coating.
