

PRODUCT INFO
**TITANIUM COATED
OSCILLATING BLADE**
AJP70822

2_{PC}

DESCRIPTION

Jorgensen's Titanium-Coated Oscillating Blades are designed for fast, precise cutting across a wide range of materials, including wood, wood with nails, drywall, PVC, copper and steel. The durable bi-metal construction offers a longer service life than high-carbon steel blades, making them ideal for demanding applications. A fine-tooth design delivers smooth, efficient cutting, while the titanium-nitride coating along the tooth strip reduces heat build-up and increases hardness to extend blade life. Featuring a universal-fit open-back connector for compatibility with most major oscillating tool brands, each pack also includes a D-Brand adapter.

FEATURES

- Ideal for cutting wood, nail-embedded wood, drywall, PVC, copper, and steel.
- Bi-metal construction for strength and durability.
- Titanium-nitride coated teeth reduce heat and increase hardness.
- Fine-tooth design for fast, efficient cutting.
- Universal-fit open-back connector suits most major oscillating tools. D-Brand adapter included.

BARCODE: 044295708227

REF. NUMBER: 75340

WIDTH: 32mm

DEPTH: 50mm

OVERALL LENGTH: 100mm

MATERIAL: Titanium Coated / Bi-Metal

TOOTH DESIGN: Fine Tooth

MOUNTING INTERFACE: Universal Fit

QUANTITY: 2 Pack

PACKAGING: Carded

WEIGHT: 22g each
