

PRODUCT INFO

T-SQUARE

GB05122

DESCRIPTION

The Goldblatt 1200mm T-Square is designed for accurate layout, measuring and cutting on drywall and plasterboard. Constructed from heat-treated aluminium, it delivers long-lasting durability while remaining lightweight for easy handling. The 3mm thick blade features high-visibility metric markings in 2mm increments, with reverse ruling for quick measurements in both directions. The angled cross head is secured with five aircraft-style rivets to maintain accuracy over time, while the 11mm flanged edge provides added strength and allows guidance along sheet edges. The 2" (50.8mm) blade allows to cut both sides of an outlet opening without moving the square.

FEATURES

- Designed for measuring, marking and cutting drywall.
- Lightweight, durable heat-treated aluminium construction.
- High-visibility metric markings - 2mm increments.
- Reverse ruled for quick measurements both directions.
- Riveted head maintains long-term accuracy.
- Flanged edge grips & guides along sheet edges.
- 2" blade allows to cut both sides of an outlet opening without moving the square.
