

PRODUCT INFO

DUAL-EDGE SAFETY BLADE

OLSKB710B

DESCRIPTION

The OLFA SKB-7 is the replacement blades for the SK-7 Compact Self-Retracting Safety Knife. Manufactured from premium Japanese carbon tool steel and honed to perfection for unmatched sharpness and edge retention, the unique 90° edge design offers a stronger and safer tip than standard utility blades. The 90° edge adds stability to the blade while reducing puncture exposure. The sloped design at the top of the blade makes it easier to identify the correct blade position for installation. Its dual-edge design doubles blade life - simply flip it for a fresh edge. Each pack comes in a plastic storage case for convenience, keeping blades secure and ready for use.

FEATURES

- Japanese tool steel for superior sharpness and durability.
- Dual-edge design for double the use - flip to reveal a fresh edge.
- 90° edge reduces punctures.
- For use with the SK-7 Self-Retracting Safety Knife.
- Pack of 10 in a plastic storage case for convenience.
