

PRODUCT INFO

POLYPROPYLENE ROPE HANK

DESCRIPTION

Stanway Polypropylene Rope Hanks are made from 3-strand twisted polypropylene for a range of general-purpose applications. The lightweight rope is durable, UV resistant and offers low stretch for reliable performance. It is suitable for securing loads and general tasks around boating, awnings, camping, trailers etc. The polypropylene construction also allows the rope to float, making it suitable for applications where buoyancy is useful. A practical and economical option for everyday tying, securing and general-purpose use.

FEATURES

- 3-Strand twisted polypropylene construction.
- General-purpose rope for everyday use.
- Durable and UV resistant.
- Low stretch for reliable securing.
- Lightweight and floats.
- Suitable for boating, camping, awnings and trailers.
