

PRODUCT INFO

CARPENTERS SQUARE

TWCS13

DESCRIPTION

The Stanway Trade Carpenters Square, also known as a framing square, is a reliable layout tool for woodworking, framing and general construction. Made from quality steel, it features clear metric markings on both sides with 2mm graduations for quick and accurate measuring. The square is ideal for marking 90° angles, checking squareness and transferring measurements. Its practical design makes it easy to use for a range of everyday carpentry and construction tasks.

FEATURES

- Quality steel construction.
- Metric markings on both sides.
- Easy-read black markings.
- Graduations measure in 2mm increments.
- Yellow anodised body for easy visibility.
- Ideal for marking 90° angles and checking squareness.
- Suitable for woodworking, framing and construction.
