

PRODUCT INFO

SCUTCH COMBS

FP5782

DESCRIPTION

The Footprint Scutch Combs are designed for use with scutch chisels, scutch hammers and SDS scutch chisels when preparing stone and masonry surfaces. Ideal for cutting, shaping and dressing stone and brickwork, these double-sided bits provide reliable performance for masonry applications. Manufactured from hardened and tempered steel for extra strength and durability, they are built for repeated use. The zinc-coated finish helps protect against rust and wear. The toothed edge of a scutch comb is used to create a textured finish on stone and brick surfaces, leaving a lined or grooved effect.

FEATURES

- Designed for use with scutch hammers and holders.
- Ideal for cutting, shaping and dressing stone and brickwork.
- Hardened and tempered steel for extra strength and durability.
- Zinc coated to prevent rust, wear and tear.
- Double-sided design for extended working life.
- Toothed edge for creating textured finishes on surfaces.

USE WITH

FP138 Scutch Hammer

BARCODE: 5013579115858

LENGTH: 25mm (1")

WIDTH: 30mm

DEPTH: 6mm

EDGE TYPE: Toothed

QUANTITY: 5 Pack

WEIGHT: 135g
