

PRODUCT INFO

PROCHALK[®] SEMI-PERMANENT

DESCRIPTION

Keson ProChalk Semi-Permanent is designed for applications requiring a durable, weather- and water-resistant marking line. Its stronger formulation provides excellent visibility and adhesion, helping lines remain in place through demanding exterior conditions before naturally wearing away over time. With a Permanence Rank of 3, it is suitable for exterior layouts, concrete layouts, roofing and metal fabrication. ProChalk Semi-Permanent delivers consistent marking performance where temporary chalk needs to remain visible for longer, making it a reliable choice for construction and trade applications. Proudly made in the USA.

FEATURES

- Provides weather- and water-resistant marking.
- Designed to remain visible for longer.
- Suitable for demanding exterior applications.
- Ideal for concrete layouts, roofing and metal fabrication.
