

PRODUCT INFO

BULL FLOAT BRACKET

GB06186

DESCRIPTION

The Goldblatt Hustler Tilting Bull Float Bracket is constructed from rugged yet lightweight aluminium for durability and ease of handling. A large protected grease reservoir provides smooth operation and easy control adjustment. Blade pitch is controlled by turning the handle, allowing adjustments while working. The bracket fits all two- and four-hole bull floats and multi-mount fresnos without requiring an adapter. Designed to fit 44mm (1-3/4") snap/push-button handles, it provides adjustable control for concrete finishing applications. Supplied bolts are included for installation.

FEATURES

- Rugged yet lightweight aluminium construction.
- Large protected grease reservoir.
- Blade pitch controlled by turning the handle.
- Fits two- and four-hole bull floats and multi-mount fresnos without an adapter.
- Fits 44mm snap/push-button handles.
- Bolts included.
