

PRODUCT INFO

MAGNESIUM BULL FLOAT

GB06184

DESCRIPTION

The Goldblatt Magnesium Bull Float is made from lightweight extruded magnesium for durability and long-lasting performance on concrete projects. Special reinforcement ribs add strength and help prevent warping during use. The properly curved, honed face helps prevent snagging, while the all-magnesium construction reduces concrete from clinging to the surface for smoother slabs and improved finishes. Featuring square ends for a defined, straight edge when working close to forms, edges and corners. Blade only - brackets are sold separately.

FEATURES

- Lightweight extruded magnesium construction.
- Reinforcement ribs add strength & help prevent warping.
- Curved, honed face helps prevent snagging.
- Reduces concrete from clinging to the float for a smoother finish.
- Square ends for defined edges.
- Blade only - brackets not included.

USE WITH

GB06186 Bullfloat Bracket

BARCODE: 084389061845

LENGTH: 1219mm (48")

WIDTH: 203mm (8")

SHAPE: Square Ends

BRACKET: None - Blade Only

MATERIAL: Magnesium

WEIGHT: 3220g
