

PRODUCT INFO

PUSH BUTTON HANDLE

GB16289

DESCRIPTION

The Goldblatt Push Button Handle is made from lightweight, durable aluminium alloy for long-lasting use. It features a swaged design with an easy-to-connect snap spring that securely locks the handle in place. The handle extends the reach of compatible concrete tools, helping provide additional working length when required. Multiple handles can be connected to each other to create a longer reach. Its lightweight construction makes it easy to handle while providing a practical extension for concrete finishing and other applications.

FEATURES

- Lightweight, durable aluminium alloy construction.
- Easy-connect snap spring securely locks handle in place.
- Extends the reach of compatible concrete tools.
- Multiple handles can be connected for added length.
- Swaged design for secure tool attachment
