

PRODUCT INFO

SQUARE MOUTH SHOVELS

DESCRIPTION

The Stanway Trade Square Shovel is designed for moving and spreading larger quantities of loose material. Its broad, deep blade allows for efficient scooping of materials such as soil, sand, mulch and gravel. It is suited to landscaping, construction and general site work. The head is made from 100% tempered, heat-treated carbon steel for strength and durability.

FEATURES

- Ideal for shifting and spreading loose materials.
- Wide, deep blade for moving larger quantities of material.
- 100% tempered, heat-treated carbon steel head.
- **Hickory D-Handle:** Strong, shock-absorbing timber handle with a D-grip for comfortable, controlled use in closer digging.
- **Long Hickory Handle:** Strong, natural shock-absorbing timber handle providing added reach and leverage.
- **Fibreglass D-Handle:** Strong, durable fibreglass handle with a D-grip for controlled use and excellent resistance to moisture, splitting and weathering.
- **Long Fibreglass Handle:** Strong, solid-core handle providing added reach and leverage with excellent resistance to moisture, splitting and weathering.
