

PRODUCT INFO

POST HOLE SHOVELS

DESCRIPTION

The Stanway Trade Post Hole Shovel is designed for digging drains, pits and other deep excavations. Reinforced ribs provide added strength for working through heavy and difficult materials, while helping reduce suction in wet clay. Foot tread provides extra downward pressure for easier digging. The head is made from 100% tempered, heat-treated carbon steel for strength and durability.

FEATURES

- Ideal for digging post holes, drains, pits and other deep excavations.
- Reinforced ribs add extra digging strength.
- Foot tread provides extra downward pressure.
- 100% tempered, heat-treated carbon steel head.
- **Long Hickory Handle:** Strong, natural shock-absorbing timber handle providing added reach and leverage.
- **Long Fibreglass Handle:** Strong, solid-core handle providing added reach and leverage with excellent resistance to moisture, splitting and weathering.
